

PATHNETWORKSOLUTIONS

Why Path? What sets us apart?

Difference. Beyond Path's history, it's important to understand our Point of View. It defines who we are and what we can do for our clients.

Here's our perspective:

Business fundamentals count. We pay attention to real metrics, like Return on Investments (ROI) and Return on Equity (ROE) so that we're always working toward creating sustainable value for our clients.

We partner with clients. This means that we share the risks and outcomes of business ventures.

Transparency is a new critical success factor: Identify your core competencies, demonstrate them, and then share them boldly. Innovation is key. It's the ultimate competitive advantage in a dynamic marketplace.

At Path, we approach business differently. In collaboration with our clients, we develop tools that wield successful enterprises. We offer a unique combination of leadership, technology expertise, partnership, and people to lead the eBusiness economy.

What Service do we provide?

We provide Staffing, IT Solutions and Healthcare.

STAFFING SOLUTIONS

Whether you are an employer looking for talented staff, an applicant looking for a great opportunity or a company needing business solutions, Path Staffing Solutions is here to serve you with professional expertise and personal attention.

Companies like yours seek our employment and employee recruitment services and trust their professional staffing needs to us. We specialize in Information technology and Health Care staffing to help your company stay focused on your core business.

Path does not measure its success by the number of places a candidate's resume is sent. Quite the contrary to our competition, we dedicate the extra time needed to interview candidates in detail and determine what their needs and wants are for career advancement. Only then, a select group of clients have the opportunity to see the candidate's resume only for positions that are considered a good fit for skills as well as the role.

- **Healthcare Staffing Solutions**

Path Networks is the global business and IT consulting company and a recognized leader with deep industry, business, and technology experience.

IT SOLUTIONS

Path Networks is business and technology consulting firm. We specialize in remote database support, website development, Search Engine Optimization, application security and application architecture. Our services and product solutions are tailored to provide significant, measurable value for clients implementing content-rich solutions using both open-source and packaged applications. Our expert consultancy and integration services help firms develop robust content solutions to effectively manage remote database and use it as a business enabler or to develop a competitive edge..

We are a collection of highly experienced business and technology consultants with many years of experience as enterprise architects, technical leads, user experience professionals, and senior project managers.

We help you achieve competitive advantage, which can be measured in terms of higher sales and profitability, optimization of assets and operational change.

Path Networks is a company committed to provide great solutions and services to a growing variety of markets. We stay abreast of the latest in technological developments as they relate to the many industries that we serve.

- Networking Solutions
- Software Solutions
- Training Solutions

HEALTH SOLUTIONS

Customer Delight! It is this ingredient that has motivated Path Network to continuously improve the quality of services and exceed customer expectations. Customer service, satisfaction, and retention are critical to Path Network growing business. Customer feedback has proven that Path Network has substantiated its status as an outsourcing solutions provider, integrating all back office operations for Health Care Organizations.

Path Network enables its customers to develop their overall business strategies, reengineer processes to improve cash flow, and develop plans for consolidating clinical and administrative systems across all locations. These integrated back office operations not only help companies improve volumes, revenues and margins, but also improve on existing processes.

Path Network always believes in prioritizing its goals and initiatives to promote success through Collaboration, Communication and Convergence!

Customer satisfaction is a top priority. No one knows Path Network better than its own customers.

Path Network places great importance upon an employee's morale, open and honest interpersonal communication, and employee involvement in decision making. These are considered crucial factors that contribute to customer satisfaction and growth of the organization.
